Industry**

External Ticket

The **External Ticket** module allows you to import, edit, and post external transactions (scale house tickets, handheld data, etc.) directly into the **Fiber Procurement** ticket file.

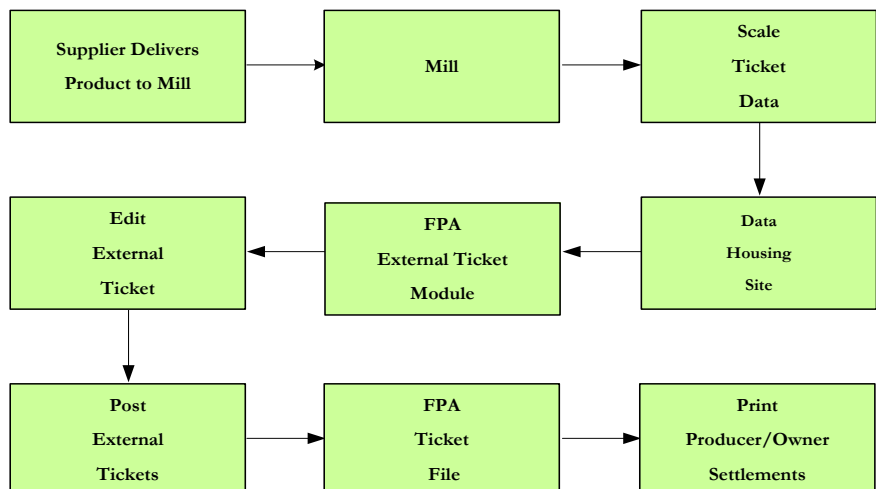

Customers using our External Ticket module are currently downloading **International Paper** scale ticket transactions from the **Liaison Technologies** integration hub. In order to download scale tickets from **Liaison Technologies**, you must first register with them.

You can also download scale tickets from **Georgia Pacific's** Self-Service website.

Benefits

- Reduces cost spent manually entering tickets
- Expedites settlement processing
- Reduces data entry errors
- Provides for a more timely scale ticket exchange between the mill and their suppliers.

Conversion Tables—Products

The External Interface module provides conversion tables for:

- Tracts
- Destinations/Culls
- Products
- Producers
- State/Countries

The Product Code as defined in the FPA System is shown on the left side of the window

The Product Code as defined by the customer providing the external transaction file that corresponds with the FPA Product code is shown on the right side of the window.

Record will be Changed

External Transaction

The External Transaction window includes the following tabs:

- General Information
- Time
- Truck/Driver Info
- Stick Scale

The External Transaction window provides for easy editing of imported transactions.

The window contains the same information as a ticket that was manually entered through the system.
