

2017 Year-End Announcements:

Forest Products Accounting – Microsoft SQL version!

We have now installed the new FPA-SQL version for more than 22 customers! Thanks to all of our customers that agreed to “**be the first**” to run this new version. Their help in troubleshooting and critiquing this new version has proved invaluable to us.

This has been an extensive project for our company and after almost 3 years, it is paying off in a big way. This new version has exceeded our expectations in all areas. The new FPA-SQL allows users to attain greater levels of application performance, reliability, connectivity, and security. One of the great advantages is report speed. Many reports run 10 times faster (or more)!

Some larger users will need to purchase a copy of Microsoft SQL database product. Otherwise there are no additional charges for this upgrade.

We will continue installing and migrating additional customers to the new FPA-SQL during 2018. We will assist in installing the new system as well as converting existing data. The system is operationally the same so there is no learning curve.

We will be contacting you during the year to set-up an appointment for installation and conversion.

New members to the Forest Products Accounting community! Automated Accounting Systems, Inc. is happy to welcome these new customers to the Forest Products Accounting community:

Deloney & Gandy Timber, Inc.

Mid Star Timber Harvesting, Inc.

SFS Corporation
