

## FPA Microsoft SQL Enhancements Log 2017

**Add Owners & Producers on the Fly (FP-129)** – Now able to add owners and producers while adding tract again.

**Journal Entries to Post to Bank Reconciliation (CR-54)** – Journal entries to bank G/L number now posts entry to the Bank Reconciliation module. This will now handle transfers between bank accounts.

**Journal Entries to Post to Equipment (CR-53)** – Journal entries to an expense G/L number can now post expense to a piece of equipment.

**Deposit Selection to Post Performance Deposit Returned to Tract (AR-47)** – When adding the check information for a deposit there is now a selection for Performance Deposit to post the return of a performance deposit to a tract.

**External Tickets (ET-40)** – Added new import for Martco – Oakdale Mill.

**FPA SQL Purge Process (SQLC-347)** – The new purge process takes less than thirty minutes where as the old one would take the most part of a full day.

**Closing of Tract (SQLC-241)** – Compare close date against tract expenses and tickets to make sure there is no activity past the closing date.

**Retain Data from Credited Ticket for Re-Entered Ticket (FP-114)** – Option to retain data from a credited ticket to be able to re-enter on a new ticket.

**Scale Indicator Connection over Ethernet (SH-98)** – Capability to connect to a scale indicator through an ethernet cable instead of a serial cable.

**Additional features added at an additional charge. Please contact Automated Accounting for quote:**

**4 Loads Interface (FL-3)** – Added an interface to Trimble Forestry's 4 Loads program.

**Load Sheet Entry (FP-308)** – Enter load sheets to compare to tickets.

**Enhanced Audit Log (CR-77)** – Audit log that will track anything changed in FPA.

**Enhanced Security (CR-77)** – Option for enhanced security that allows for complexity of password (length of password, days for password to expire, required characters, and number of attempts before lock out).
